The performance presented represents past performance and is not a guarantee of future results. Total return assumes reinvestment of dividends and capital gain distributions. Investment return and principal value will vary so that, when redeemed, an investor's shares may be worth more or less than their original cost. Current performance may be higher or lower than the performance quoted. For most recent month-end performance, visit clipperfund.com or call 800-432-2504. The Fund received favorable class action settlements from companies that it no longer owns. These settlements had a material impact on the investment performance of the Fund in 2009. This was a one-time event that is unlikely to be repeated. Clipper Fund was managed from inception, February 29, 1984, until December 31, 2005 by another Adviser. Davis Selected Advisers, L.P. took over management of the Fund on January 1, 2006.

1. Date DSA took over management. 2. The Fund generally uses Global Industry Classification Standard ("GICS") as developed by Morgan Stanley Capital International and Standard & Poor's Corporation to determine industry classification. GICS presents industry classification as a series of levels (i.e. sector, industry group, industry, and sub-industry). Allocations shown are at the Industry Group level except for the following industry groups which have been combined as indicated: Technology: Software & Services, Technology Hardware & Equipment, Semiconductors, & Semiconductor Equipment; Pharmaceutical & Health Care: Pharmaceuticals, Biotechnology & Life Sciences, Health Care Equipment & Services. The advisor may reclassify a company into an entirely different industry if it believes that the GICS classification for a specific company does not accurately describe the company. Industry Group weightings are subject to change.

This material is authorized for use by existing shareholders. A current Clipper Fund prospectus must accompany or precede this piece if it is distributed to prospective shareholders. You should carefully consider the Fund's investment objectives, risks, fees and expenses before investing. Read the prospectus carefully before you invest or send money.

Objective and Risks. Clipper Fund's investment objective is long-term capital growth and capital preservation. There can be no assurance that the Fund will achieve its objective. The Fund invests primarily in equity securities issued by large companies with market capitalizations of at least \$10 billion. Some important risks of an investment in the Fund are: **common stock risk:** an adverse event may have a negative impact on a company and could result in a decline in the price of its common stock; **depository receipts risk:** depository receipts may trade at a discount (or premium) to the underlying security and may be less liquid than the underlying securities listed on an exchange; **fees and expenses risk:** the Fund may not earn enough through income and capital appreciation to offset the operating expenses of the Fund; **financial services risk:** investing a significant portion of assets in the financial services sector may cause the Fund to be more sensitive to systemic risk, regulatory actions, changes in interest rates, non-diversified loan portfolios, credit, and competition; **focused portfolio risk:** investing in a limited number of companies causes changes in the value of a single security to have a more significant effect on the value of the Fund's total portfolio; **foreign country risk:** foreign companies may be subject to greater risk as foreign economies may not be as strong or diversified. As of December 31, 2017, the Fund had approximately 13.8% of assets invested in foreign companies;

foreign currency risk: the change in value of a foreign currency against the U.S. dollar will result in a change in the U.S. dollar value of securities denominated in that foreign currency; **headline risk:** the Fund may invest in a company when the company becomes the center of controversy. The company's stock may never recover or may become worthless; **large-capitalization companies risk:** companies with \$10 billion or more in market capitalization generally experience slower rates of growth in earnings per share than do mid- and small-capitalization companies; **manager risk:** poor security selection may cause the Fund to underperform relevant benchmarks; **mid- and small-capitalization companies risk:** companies with less than \$10 billion in market capitalization typically have more limited product lines, markets and financial resources than larger companies, and may trade less frequently and in more limited volume; and **stock market risk:** stock markets have periods of rising prices and periods of falling prices, including sharp declines. See the prospectus for a complete description of the principal risks.

Clipper Fund has adopted a Portfolio Holdings Disclosure policy that governs the release of non-public portfolio holding information. This policy is described in detail in the prospectus. Visit clipperfund.com or call 800-432-2504 for the most current public portfolio holdings information.

The S&P 500 Index is an unmanaged index of 500 selected common stocks, most of which are listed on the New York Stock Exchange. The Index is adjusted for dividends, weighted towards stocks with large market capitalizations and represents approximately two-thirds of the total market value of all domestic common stocks. Investments cannot be made directly in an index.

After April 30, 2018, this material must be accompanied by a supplement containing performance data for the most recent quarter end.

Shares of the Clipper Fund are not deposits or obligations of any bank, are not guaranteed by any bank, are not insured by the FDIC or any other agency, and involve investment risks, including possible loss of the principal amount invested.
